

PRINCE2™ Project Management Training

PRINCE2™ (which stands for **PR**ojects **IN** **C**ontrolled **E**nvironments) is the de facto project management methodology providing an easily tailored, and scalable method for the management of all types of projects. It is used extensively by the government of the UK, and is widely recognized and used in the private sector, both in the UK and internationally. PRINCE2™ is a universal method that can be used for large and small projects alike, and one that is not dependent on any particular area of application. PRINCE2™'s popularity is growing in the United States. It is becoming a key methodology for managing projects because it complements PMI's® Project Management Body of Knowledge (PMBOK®).

The PRINCE2™ process of project implementation has eight steps. They are:

1. Starting up
2. Directing a project
3. Initiating a project
4. Controlling a stage
5. Managing stage boundaries
6. Planning
7. Managing product delivery
8. Closing a project

Throughout all these phases, PRINCE2™ project managers apply five concepts, which are:

1. Control
2. Quality
3. Planning
4. Lesson learned
5. Risk management

Although these processes and concepts are standard, PRINCE2™ is inherently amenable to new ideas – hence, the growth in its popularity.

BUCEC has become the first and only PRINCE2™ Authorized Training Organization (ATO) in the United States. We have courses designed to introduce the PRINCE2™ methodology, train students in its application, and prepare them for both the Foundation and Practitioner certification exams.

PRINCE2™ methodology describes how a project is divided into manageable stages, enabling efficient control of resources and regular progress monitoring throughout the project. It is a structured method providing organizations with a standard approach to the management of projects by:

- Organizing the life of a project – beginning, middle and end – and each activity along the way
- Tying together *what* has to be done with *why* and *when* it should be done to be most effective
- Providing a common language, common goals, defined deliverables and approach, and a specified timeframe to your project
- Achieving consistent, predictable, and repeatable project results
- Meeting the individual needs of any size project – large or small

MDP 334 - PRINCE2™: Foundation

This interactive course provides students with a comprehensive understanding of PRINCE2™ theory and prepares them for the Foundation certification exam. In order to prepare for this exam, which is taken at the end of the course, each student will be required to complete significant pre-course and evening work. A one-hour exam is given at the end of this class.

What You Will Learn

- An understanding of the need for controlled project management and how PRINCE2™ meets that requirement
- An understanding of the key PRINCE2™ principles and terminology
- An understanding of the PRINCE2™ organizational structure, components, processes, techniques, and management products and how they all work

MDP 335 - PRINCE2™: Practitioner

This course provides students with an applied understanding of PRINCE2™ and prepares them for the Practitioner certification exam. In order to prepare for this exam, which is taken at the end of the course, each student will be required to complete significant pre-course and evening work. A 3-hour exam is given at the end of this class.

What You Will Learn

- How to navigate through all 8 PRINCE2™ processes and 45 sub-processes
- How to navigate key PRINCE2™ elements through the appropriate PRINCE2™ processes and sub-processes
- How to create a number of PRINCE2™ management products as they relate to a project scenario

GSA Preferred Pricing

We offer GSA preferred pricing for our project management courses under the Management Organization and Business Improvement Services (MOBIS) Contract # GS-10F-0387N.
